culturable micro-organisms at 22°C - 7 days with identification, *Pseudomonas aeruginosa* and yeasts

### 22M83A.2 - Waters intended for medical use - sent in October 2022 - Refrigerated parcel

culturable micro-organisms at 22°C - 7 days with identification, *Pseudomonas aeruginosa* and yeasts

### PARTICULARITIES

Aerobic flora culturable at 22°C during 7 days (advised culture media: R2A)

For all the parameters of this programme, uncertainties are calculated and provided to the participants. The indicators are the repeatability uncertainty  $ur^2$  and the reproducibility uncertainty  $uR^2$  specific to each participant. The uncertainty evaluated for the whole profession is also presented.
